

WORKSHEET: Criteria for Approval			
NUMBER	DATE	PAGE	
HRP-314	5/1/2022	1 of 4	

The purpose of this worksheet is to provide support for IRB members reviewing research. This worksheet must be used. It does not need to be

COIII	pleted or retained. (LAR = "subject's legally authorized representative") 1
1	General Considerations (Check if "Yes" or "N/A". All must be checked)
	The convened IRB (or <u>Designated Reviewer</u> ) has, or has obtained through consultation, adequate expertise.
	For initial review see if the principal investigator has unaddressed expired studies. ("N/A" if not initial review) N/A:
	Application materials are complete.
2	Criteria for Approval of Research: (Check if "Yes" or "N/A". All must be checked) (Applies to initial, continuing, modifications)
	See <b>Section 9</b> for considerations as applicable.
	Risks to subjects are minimized by using procedures, that are consistent with sound research design and that do not unnecessarily expose
	subjects to risk.
	Risks to subjects are minimized by using procedures already being performed on the subjects for diagnostic or treatment purposes. ("N/A"
	if none) N/A: □ Risks to subjects are reasonable in relation to anticipated benefits, if any, to subjects, and the importance of the knowledge that may
ш	reasonably be expected to result.
	Selection of subjects is equitable. (Consider the purpose and setting of the research, involvement of vulnerable subjects, selection criteria,
_	and recruitment, enrollment, and payment procedures.)
	The research plan makes adequate provision for monitoring the data collected to ensure the safety of subjects. ("N/A" if < Minimal Risk)
	N/A: □ <sup>   </sup>
	There are adequate provisions to protect the privacy of subjects. iv
	There are adequate provisions to maintain the confidentiality of data.
	Additional safeguards have been included in the study to protect the rights and welfare of subjects vulnerable to coercion or undue influence. vi ("N/A" if no vulnerable subjects) N/A:
	The informed consent process meets one of these sections or checklists
ш	☐ HRP-410 - CHECKLIST - Waiver or Alteration of
	☐ Section 5: Consent Process Consent Process ☐ Permanently closed to enrollment
	The informed consent documentation meets one of these sections, worksheets, or checklists
	☐ HRP-411 - CHECKLIST - Waiver of Written
	☐ Section 6: Long Form Documentation of Consent ☐ Permanently closed to enrollment
	☐ HRP-410 - CHECKLIST - Waiver or Alteration of
	Consent Process
	Consent Process  Additional applicable criteria <sup>vii</sup> are met ("N/A" if none) N/A: □
3	Consent Process  Additional applicable criteria <sup>vii</sup> are met ("N/A" if none) N/A: □  Additional Considerations (Check all that apply.)
3	Consent Process  Additional applicable criteriavii are met ("N/A" if none) N/A: □  Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?
3	Consent Process  Additional applicable criteriavii are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018
3	Consent Process  Additional applicable criteriavii are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)
3	Consent Process  Additional applicable criteriavii are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:
3	Consent Process  Additional applicable criteriavi are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)
3	Consent Process  Additional applicable criteria <sup>vii</sup> are met ("N/A" if none) N/A: □  Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  □ The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  □ The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A)  Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data
3	Consent Process  Additional applicable criteria <sup>vii</sup> are met ("N/A" if none) N/A: □  Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  □ The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  □ The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A)  Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care.
3	Additional applicable criteriavii are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A)  Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care.  Should review take place more often than annually? Viii If so, specify period.
3	Additional applicable criteriavii are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A)  Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care.  Should review take place more often than annually?  Is verification needed from sources other than the investigator that no material changes have occurred since prior review?  ("N/A" if initial) N/A:
3	Additional applicable criteriavii are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A)  Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care. ("N/A" if
3	Additional applicable criteriavii are met ("N/A" if none) N/A: □  Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018  Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  □ The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  □ The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A)  Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care.  Should review take place more often than annually?  Should review take place more often than annually?  Is verification needed from sources other than the investigator that no material changes have occurred since prior review?  ("N/A" if initial) N/A:  Does information need to be provided to subjects because it may affect their willingness to continue participation? ("N/A" if initial) N/A:
3	Additional applicable criteriavii are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A)  Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care.  Should review take place more often than annually?viii If so, specify period.  Is verification needed from sources other than the investigator that no material changes have occurred since prior review?ix ("N/A" if initial) N/A:  Does information need to be provided to subjects because it may affect their willingness to continue participation? ("N/A" if initial) N/A:  Primary Reviewer Criteria for Initial review (Check if "Yes" or "N/A". All must be checked; May be determined by a primary reviewer)  The research has the resources necessary to protect subjects. (Time to conduct and complete the research; adequate facilities, subject
3 	Additional applicable criteriavii are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018  Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A)  Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care.  Should review take place more often than annually? If so, specify period.  Is verification needed from sources other than the investigator that no material changes have occurred since prior review? ("N/A" if initial) N/A:  Does information need to be provided to subjects because it may affect their willingness to continue participation? ("N/A" if initial) N/A:  Primary Reviewer Criteria for Initial review (Check if "Yes" or "N/A". All must be checked; May be determined by a primary reviewer)  The research has the resources necessary to protect subjects. (Time to conduct and complete the research; adequate facilities, subject pool, and medical/psychosocial resources; qualified investigators and research staff; appropriate qualifications for international research.)
3 	Additional applicable criteria i are met ("N/A" if none) N/A: □  Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  □ The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  □ The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A)  Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care.  Should review take place more often than annually? If so, specify period.  Is verification needed from sources other than the investigator that no material changes have occurred since prior review? ("N/A" if initial) N/A: □  Does information need to be provided to subjects because it may affect their willingness to continue participation? ("N/A" if initial) N/A:  □  Primary Reviewer Criteria for Initial review (Check if "Yes" or "N/A". All must be checked; May be determined by a primary reviewer)  The research has the resources necessary to protect subjects. (Time to conduct and complete the research; adequate facilities, subject pool, and medical/psychosocial resources; qualified investigators and research staff; appropriate qualifications for international research.)  The plan for communication among sites is adequate to protect subjects. ("N/A" if not a Multi-Site Study where PI is the lead or not initial) N/A:
3 	Additional applicable criteria <sup>vii</sup> are met ("N/A" if none) N/A: □  Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018  Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply: □ The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review) □ The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A) Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care.  Should review take place more often than annually?viii If so, specify period.  Is verification needed from sources other than the investigator that no material changes have occurred since prior review?vix ("N/A" if initial) N/A: □  Does information need to be provided to subjects because it may affect their willingness to continue participation? ("N/A" if initial) N/A: □  Primary Reviewer Criteria for Initial review (Check if "Yes" or "N/A". All must be checked; May be determined by a primary reviewer) The research has the resources necessary to protect subjects. (Time to conduct and complete the research; adequate facilities, subject pool, and medical/psychosocial resources; qualified investigators and research staff; appropriate qualifications for international research.)  The plan for communication among sites is adequate to protect subjects. ("N/A" if not a Multi-Site Study where PI is the lead or not
3 	Additional applicable criteria are met ("N/A" if none) N/A:   Additional Considerations (Check all that apply.)  Does the research involve no more than Minimal Risk to subjects?  Does the research require Continuing review? (Note that for FDA or DOJ overseen research or research subject to Pre-2018 Requirements, there is no option not to require Continuing review.)  The research does not require Continuing review if one of the following apply:  The research is eligible for expedited review. See HRP-313 – WORKSHEET - Expedited Review)  The research has progressed to the point that it involves only one or both of the following, which are part of the IRB-approved study: (A) Data analysis, including analysis of identifiable private information or identifiable biospecimens, or (B) Accessing follow-up clinical data from procedures that subjects would undergo as part of clinical care.  Should review take place more often than annually? is o, specify period.  Is verification needed from sources other than the investigator that no material changes have occurred since prior review? ("N/A" if initial) N/A:  Does information need to be provided to subjects because it may affect their willingness to continue participation? ("N/A" if initial) N/A:  Primary Reviewer Criteria for Initial review (Check if "Yes" or "N/A". All must be checked; May be determined by a primary reviewer)  The research has the resources necessary to protect subjects. (Time to conduct and complete the research; adequate facilities, subject pool, and medical/psychosocial resources; qualified investigators and research staff; appropriate qualifications for international research.)  The plan for communication among sites is adequate to protect subjects. ("N/A" if not a Multi-Site Study where PI is the lead or not initial) N/A:  There are no inconsistencies between the DHHS grant and protocol. ("N/A" if research subject to 2018 Requirements or if there is no

## WORKSHEET: Criteria for Approval NUMBER DATE PAGE

NUMBER	DATE	PAGE
HRP-314	5/1/2022	2 of 4

	The circumstances of consent minimize the possibility of coercion or undue influence.			
	Information to be given to the subject or LAR will be in language understandable to the subject or LAR.			
	releases or appears to release the investigator,	n the subject or LAR is made to waive or appear to waive the subject's legal rights, or the sponsor, the institution or its agents from liability from negligence.		
	Consent will disclose the elements in Section 7	as applicable: Elements of Consent Disclosure		
6	Long Form of Consent Documentation (Check	k if "Yes" or "N/A". All must be checked)		
	The written consent document is accurate, com	plete, and consistent with the protocol.		
		ements in Section 7 as applicable: Elements of Consent Disclosure		
		· ·		
	The person obtaining consent will sign and date			
<u></u>	, ,			
		ent will be given to the person signing the document.		
	☐ If there is a LAR or parent signature line, the IRB has approved inclusion of adults unable to consent or children. ("N/A" if no signature line) N/A: ☐			
	•			
	document notes that the witness attests that the	partial witness will be present during the entire consent discussion and the consent information in the consent document and any other information provided was accurately esubject or LAR, and that consent was freely given. 9	Recruitment Exclusion for Research Subject to revised 2018 Common Rule				
	An IRB may approve a research proposal in which an investigator will obtain information or biospecimens for the purpose of screening, recruiting, or determining the eligibility of prospective subjects without the informed consent of prospective subject or subject's LAR, if either of the following conditions are met:				
	☐ The investigator will obtain information through oral or written communication with the prospective subject or LAR, <b>or</b>				
	☐ The investigator will obtain identifiable private information or identifiable biospecimens by accessing records or stored identifiable				stored identifiable
		biospecimens			

- ii In making this assessment the IRB should take into account the purposes of the research and the setting in which the research will be conducted. The IRB should be particularly cognizant of the special problems of research that involves a category of subjects who are vulnerable to coercion or undue influence, such as children, prisoners, individuals with impaired decision-making capacity, or economically or educationally disadvantaged persons.
- when the IRB determines that data and safety monitoring is appropriate, the IRB will evaluate the adequacy of those plans by considering such issues as reporting mechanisms, the frequency of the monitoring, the entity that will conduct the monitoring, the specific data to be monitored, procedures for analysis and interpretation of the data, actions to be taken upon specific events or end points, and procedures for communication from the data monitor to the IRB and sites. (AAHRPP Tip Sheet #6, section 5)
- iv The IRB will consider it appropriate to include adequate provisions to protect the privacy of subjects when there is a reasonable expectation that prospective research subjects will want to control how, and with whom, they interact and communicate, particularly on issues that may be "sensitive" or "private." The IRB will determine whether there are adequate provisions to protect the privacy of subjects by considering subjects' potential comfort with the procedures being performed, comfort with the research setting, and comfort with the information being sought. (AAHRPP Tip Sheet #5 section 2b-c)
- The Secretary of HHS will, after consultation with the Office of Management and Budget's privacy office and other Federal departments and agencies that have adopted this policy, issue guidance to assist IRBs in assessing what provisions are adequate to protect the privacy of subjects and to maintain the confidentiality of data.
- vi When some or all of the subjects are likely to be vulnerable to coercion or undue influence, such as children, prisoners, individuals with impaired decision-making capacity, or economically or educationally disadvantaged persons, additional safeguards have been included in the study to protect the rights and welfare of these subjects.
- vii HRP-315 WORKSHEET Advertisements; HRP-316 WORKSHEET Payments; HRP-318 WORKSHEET Additional Federal Agency Criteria; HRP-412 CHECKLIST Pregnant Women; HRP-413 CHECKLIST Non-Viable Neonates; HRP-414 CHECKLIST Nonates of Uncertain Viability; HRP-415 CHECKLIST Prisoners; HRP-416 CHECKLIST Children; HRP-417 CHECKLIST Cognitively Impaired Adults; HRP-418 CHECKLIST Non-Significant Risk Device.
- viii Consider nature and level of risks; degree of uncertainty regarding the risks; subject vulnerability; investigator experience; IRB's experience with investigator or sponsor; projected rate of enrollment; and whether study involves novel procedures.
- ix Implement when the veracity of the information provided is questioned.
- <sup>x</sup> 21 CFR 56.109 (b): (b) An IRB shall require that information given to subjects as part of informed consent is in accordance with 50.25. The IRB may require that information, in addition to that specifically mentioned in 50.25, be given to the subjects when in the IRB's judgment the information would meaningfully add to the protection of the rights and welfare of subjects.

<sup>&</sup>lt;sup>i</sup> In evaluating risks and benefits, the IRB should consider only those risks and benefits that may result from the research (as distinguished from risks and benefits of therapies subjects would receive even if not participating in the research). The IRB should not consider possible long-range effects of applying knowledge gained in the research (for example, the possible effects of the research on public policy) as among those research risks that fall within the purview of its responsibility.
